

Information System Analysis and Design of BRAC(UDP)

Vision

BRAC envisions a world free from all forms of exploitation and discrimination, where every individual has the opportunity to realize their full potential. By dismantling barriers of gender, socioeconomic status, and ethnicity

Mission

BRAC's mission is to empower people and communities facing poverty, illiteracy, disease, and social injustice. Through economic and social programs

Key activities

- > Climate change initiatives
 - > Healthcare services
 - > Youth empowerment and education
 - > Urban and rural development
- 

System Development Life Cycle of BRAC

Overview

Key stages

- Recognition of need
- Feasibility analysis
- Design implementation
- Post-implementation and maintenance

Consideration

- political factors
 - Planning
 - Control prototyping
- 

Recognition of need

Identify problems or opportunities.

» **Problem identification**

Surveys, community meetings, data analysis (e.g., need for better maternal healthcare)

» **Stakeholder Engagement**

Engaging communities, beneficiaries, staff, and partners.

Feasibility Study

Assess practicality and impact.

- > **Technical Feasibility:** Technology and expertise availability.
 - > **Economic Feasibility:** Cost-effectiveness and ROI.
 - > **Operational Feasibility:** Organizational capacity.
 - > **Legal and Environmental Feasibility:** Legal/environmental constraints.
- 

Analysis

Detailed examination of requirements and specifications

Requirement Gathering: Collecting detailed stakeholder requirements.

Gap Analysis: Identifying gaps between current and desired outcomes.

Risk Analysis: Assessing risks and mitigation strategies.

Design

Develop a detailed blueprint.

Conceptual Design: High-level structure and approach.

Detailed Design: Technical and functional specifications.

Prototyping: Testing concepts and gathering feedback.

Implementation

Deploy the program.

Development: Constructing system components.

Integration: Ensuring seamless component functionality.

Testing: Rigorous and user acceptance testing.

Training: Comprehensive user and administrator training.

Post-Implementation and Maintenance

Monitor and adjust the system

Performance Monitoring: Continuous tracking.

Feedback Collection: Gathering beneficiaries feedback.

Maintenance: Ongoing updates and enhancements.

Political Considerations

Address political and organizational factors

Stakeholder Alignment: Aligning with policies and priorities.

Advocacy and Lobbying: Government support and approvals.

Conflict Management: Mitigating political conflicts.

Planning and Control

Ensure effective project planning and control.

Project Management: Robust methodologies for planning and monitoring.

Resource Allocation: Adequate budget, personnel, and technology.

Performance Metrics: Clear metrics for success.

Planning and Control

Ensure effective project planning and control.

Project Management: Robust methodologies for planning and monitoring.

Resource Allocation: Adequate budget, personnel, and technology.

Performance Metrics: Clear metrics for success.

BRAC's Approach to Urban Development

Needs Assessment and Community Engagement

Needs Assessment: Identifying community-specific needs.

Community Mobilization: Engaging and empowering locals.

Stakeholder Engagement: Collaborating with key stakeholders.

Pilot Projects: Testing initiatives on a small scale.

Policy Advocacy: Influencing policies for support.

Research and Data Collection: Ensuring evidence-based interventions.

Effective Planning and Resource Allocation

Community Focus: Empowering local leaders.

Collaborative Partnerships: Working with public, private, and international partners.

Integrated Services: Combining health, education, and sanitation.

Sustainability: Long-term planning and environmental practices.

Prototyping and Innovation

Pilot Projects: Small-scale testing of new ideas.

Innovation: Supporting grassroots initiatives.

Customization: Adapting solutions to local needs.

Policies

Social Development: Education, health, legal aid.

Economic Development: Microfinance, agriculture, enterprise growth.

Environmental Sustainability: Climate change, renewable energy.

Gender Equality: Women's empowerment and participation.

INSIGHTS

Talha Tasnim

Officer, Project Monitoring & Evaluation, Urban
Development Program

Responsibilities

Monitoring

Overseeing program processes and outcomes.

Data Collection

- > Conducting surveys, interviews, FGDs, and consultations.
- > Implementing real-time monitoring systems using ICT.

Support and Training:

- > Assisting community and program organizers with ICT tools for data collection.
 - > Providing training for mobile data collection platforms.
- 

STRUCTURE ANALYSIS

Data flow diagram

Decision tree

Decision table

Condition Stub	1	2	3	4	5
IF					
The request is valid?	Y	Y	Y	Y	N
Requirements clearly defined?	Y	Y	Y	N	-
The plan is complete and feasible?	Y	Y	N	-	-
Project successful?	Y	N	-	-	-
THEN					
Document Result and end process	X				
Analyze issues and implement improvement for future projects		X			
Execute project according to plan	X	X			
Revise plan			X		
Revise objectives and requirements				X	
Reject request & End process					X
Action Stub	1	2	3	4	5

FEASIBILITY ANALYSIS

Focus

Creating inclusive, safe, resilient, and sustainable cities in Bangladesh.

Challenges

Manual and inefficient fundraising process.

Fundraising Challenges

Manual Donor Management

- » Time-consuming and prone to errors.
- » Leads to missed opportunities.

Inefficient Fund Allocation

- » Delays in processing contributions.
- » Affects swift response to urban needs.

Lack of Data-Driven Insights

- » Limits informed decision-making.

Inconsistent Engagement Strategies

- » Reduces donor retention and engagement.
- 

STEPS FOLLOWED

1.

Form a Project Team and Appoint a Project Leader

Assembled a specialized team including experts in data science, AI, system analysis, finance, and key stakeholders from BRAC's Urban Development Program

2.

Prepare System Flowcharts

To illustrate the current manual fundraising process, highlighting **key steps**: data collection, data entry, minimal data analysis, limited decision-making, and delayed implementation.

3.

Enumerate Potential Candidate Systems

Identified three potential systems to address fundraising challenges.

Traditional Fundraising Management System

Provides basic donor management tools but struggles with scalability and complex needs.

CHARACTERISTICS

Features:

- Basic donor management tools,
- simple donation tracking
- Basic reporting.

Strengths: Provides foundational functionalities for donor management.

Limitations:

- Limited scalability struggles with increasing data volume and complexity, and constrained adaptability, leading to potential inefficiencies in larger or more complex fundraising operations.
- 

AI-Driven Fundraising Prediction System

Utilizes AI to offer predictive insights into donor behavior but has moderate scalability challenges.

CHARACTERISTICS

Features:

- Uses artificial intelligence to generate predictive insights about donor behavior and fundraising outcomes.

Strengths:

- Forecasts donor engagement trends and suggests targeted strategies for optimizing fundraising efforts.

Limitations:

- Moderate scalability, relies heavily on the quality of input data, and may not fully address the comprehensive decision-making needs of large-scale fundraising operations.
- 

Weighted Criteria-Based Decision Support System (WCDSS)

Offers advanced decision support with high scalability and integration, making it the most suitable option for optimizing fundraising efforts.

CHARACTERISTICS

Features:

- Advanced analytics
- High scalability
- Weighted criteria approach for decision-making.

Strengths:

- Handles large data volumes and complex decision-making processes efficiently, integrates diverse data sources, and provides precise insights into donor behavior, funding opportunities, and resource allocation.

Limitations:

- Higher initial cost but cost-effective in the long term due to its scalability and operational efficiency
- 

4.

Evaluate Performance and Cost Effectiveness of Each Candidate System

Assessed the performance and cost-effectiveness of each system

Evaluated each system based on features, strengths, and limitations:

TFMS

- > Basic performance
- > Low cost
- > Limited scalability.

AIDFPS

- > Enhanced performance with AI
- > Moderate cost
- > Potential scalability issues.

WCDSS

- > High performance
- > Higher initial cost
- > Cost-effective long-term with scalability.

5.

Weight System Performance and Cost Data

Assigned weights to evaluation criteria

Evaluation Criteria

- » **Performance: 0.4**
- » **Cost: 0.3**
- » **Scalability: 0.2**
- » **Ease of Integration: 0.1**

Weighted Scores

Criteria	TFMS	AIDFPS	WCDSS
Performance (0.4)	2	3	5
Cost (0.3)	4	3	4
Scalability (0.2)	1	3	5
Ease of Integration (0.1)	3	4	5
Total Weighted Score	2.4	3.3	4.8

6.

Select the Best Candidate System

Using a Weighted Candidate Evaluation Matrix, determined **WCDSS** as the best candidate based on superior performance and scalability.

7.

Prepare and Report Final Project Directive to Management

Presented the final report to BRAC's management, recommending the implementation of WCDSS to optimize fundraising efforts and ensure efficient resource allocation.

Conclusion

- » **Recommendation:** Implement WCDSS.
 - » **Benefits:** Optimizes fundraising efforts and ensures efficient resource allocation.
- 

THANKS!

INSTRUCTIONS FOR USE

EDIT IN GOOGLE SLIDES

Click on the button under the presentation preview that says "Use as Google Slides Theme".

You will get a copy of this document on your Google Drive and will be able to edit, add or delete slides.

You have to be signed in to your Google account.

EDIT IN POWERPOINT®

Click on the button under the presentation preview that says "Download as PowerPoint template". You will get a .pptx file that you can edit in PowerPoint.

Remember to download and install the fonts used in this presentation (you'll find the links to the font files needed in the [Presentation design slide](#))

More info on how to use this template at www.slidescarnival.com/help-use-presentation-template

This template is free to use under [Creative Commons Attribution license](#). You can keep the Credits slide or mention SlidesCarnival and other resources used in a slide footer.

TRANSITION HEADLINE

Let's start with the first set of slides

“Quotations are commonly
printed as a means of
inspiration and to invoke
philosophical thoughts from
the reader”

BIG CONCEPT

Bring the attention of your audience over a key concept using icons or illustrations

YOU CAN ALSO SPLIT YOUR CONTENT

White

Is the color of milk and fresh snow, the color produced by the combination of all the colors of the visible spectrum.

Black

Is the color of ebony and of outer space. It has been the symbolic color of elegance, solemnity and authority.

IN TWO OR THREE COLUMNS

Yellow

Is the color of gold, butter and ripe lemons. In the spectrum of visible light, yellow is found between green and orange.

Blue

Is the colour of the clear sky and the deep sea. It is located between violet and green on the optical spectrum.

Red

Is the color of blood, and because of this it has historically been associated with sacrifice, danger and courage.

A PICTURE IS WORTH A THOUSAND WORDS

A complex idea can be conveyed with just a single still image, namely making it possible to absorb large amounts of data quickly.

Want big impact?
USE BIG IMAGE.

USE CHARTS TO EXPLAIN YOUR IDEAS

AND TABLES TO COMPARE DATA

	A	B	C
Yellow	10	20	7
Blue	30	15	10
Orange	5	24	16

MAPS

89,526,124

Whoa! That's a big number, aren't you proud?

89,526,124\$

That's a lot of money

185,244 USERS

And a lot of users

100%

Total success!

OUR PROCESS IS EASY

LET'S REVIEW SOME CONCEPTS

Yellow

SlidesCarnival icons are editable shapes.

This means that you can:

- Resize them without losing quality.
- Change fill color and opacity.
- Change line color, width and style.

Isn't that nice? :)

Examples:

Diagrams and infographics

You can also use any emoji as an icon!

And of course it resizes without losing quality.

How? Follow Google instructions
